### Detailed Action

Note: A new non-final office action after the decision on appeal by the Board of Patent Appeals submitted on December 30, 2010.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

*Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.*

Claims 6 and 8-15 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

With regard to claims 6 and 8-15, a claimed process is eligible for patent protection under 35 U.S.C. § 101 if:

*"(1) it is tied to a particular machine or apparatus, or (2) it transforms a particular article into a different state or thing. See Benson, 409 U.S. at 70 ('Transformation and reduction of an article 'to a different state or thing' is the clue to the patentability of a process claim that does not include particular machines. '); Diehr, 450 U.S. at 192 (holding that use of mathematical formula in process 'transforming or reducing an article to a different state or thing' constitutes patent-eligible subject matter); see also Flook, 437 U.S. at 589 n.9 ('An argument can be made [that the Supreme] Court has only recognized a process as within the statutory definition when it either was tied to a particular apparatus or operated to change materials to a 'different state or thing' '); Cochrane v. Deener, 94 U.S. 780, 788 (1876) ('A process is...an act, or a series of acts, performed upon the subject-matter to be transformed and reduced to a different state or thing.').<sup>7</sup> A claimed process involving a fundamental principle that uses a particular machine or apparatus would not pre-empt uses of the principle that do not also use the specified machine or apparatus in the manner claimed. And a claimed process that transforms a particular article to a specified different state or thing by applying a fundamental principle would not pre-empt the use of the principle to transform any other article, to transform the same article but in a manner not covered by the claim, or to do anything other than*

*transform the specified article.” (In re Bilski, 88 USPQ2d 1385, 1391 (Fed. Cir. 2008))*

Also noted in *Bilski* is the statement, “Process claim that recites fundamental principle, and that otherwise fails ‘machine-or-transformation’ test for whether such claim is drawn to patentable subject matter under 35 U.S.C. §101, is not rendered patent eligible by mere field-of-use limitations; another corollary to machine-or-transformation test is that recitation of specific machine or particular transformation of specific article does not transform unpatentable principle into patentable process if recited machine or transformation constitutes mere ‘insignificant post-solution activity.’” (*In re Bilski, 88 USPQ2d 1385, 1385 (Fed. Cir. 2008)*) Examples of insignificant post-solution activity include data gathering and outputting. Furthermore, the machine or transformation must impose meaningful limits on the scope of the method claims in order to pass the machine-or-transformation test. Please refer to the USPTO’s “Guidance for Examining Process Claims in view of *In re Bilski*” memorandum dated January 7, 2009,

[http://www.uspto.gov/web/offices/pac/dapp/opla/documents/bilski\\_guidance\\_memo.pdf](http://www.uspto.gov/web/offices/pac/dapp/opla/documents/bilski_guidance_memo.pdf) .

It is also noted that the mere recitation of a machine in the preamble in a manner such that the machine fails to patentably limit the scope of the claim does not make the claim statutory under 35 U.S.C. § 101, as seen in the Board of Patent Appeals Informative Opinion *Ex parte Langemyr et al.* (Appeal 2008-1495),  
<http://www.uspto.gov/web/offices/dcom/bpai/its/fd081495.pdf> .

Claims 6 and 8-15 are not tied to a particular machine or apparatus nor do they transform a particular article into a different state or thing, thereby failing the machine-or-transformation test; therefore, claims 6 and 8-15 are non-statutory under § 101.

***Allowable Subject Matter***

Claims 1-2, 4-5, and 16-21 are allowed.

The following is an examiner's statement of reasons for allowance: The prior arts of record fail to teach, singly or in combination, an account acquisition fraud management system, the account acquisition fraud management system comprising: a first analysis engine, wherein the first analysis engine is associated with a first stored value product; a second analysis engine, wherein the second analysis engine is associated with a second stored value product from a different issuer than an issuer of the first stored value product; and a cross monitor, wherein the cross monitor is operable to accept a first transaction information from the first analysis engine about a first transaction with the first stored value product and a second transaction information from the second analysis engine about a second transaction with the second stored value product, wherein the first transaction information is provided from the cross monitor to the second analysis engine; and wherein the second analysis engine is operable to recognize a common load source account to associate the transactions and determine a transaction velocity from the first and second transaction information, and stalling the second transaction when the transaction velocity exceeds a velocity threshold.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
